

## Upfield Public Grievance and Issues Tracker

Upfield is committed to sourcing our ingredients sustainably and responsibly. We also expect our direct suppliers to act in accordance with Upfield's Responsible Sourcing Policy, and the policies pertaining to our individual commodities.

As part of Upfield's commitment to transparency, we publish grievances and issues via this tracker. This tracker consists of:

- Grievance cases directed towards Upfield, related to palm oil, soybean oil, coconut, or pulp & paper; and
- Priority issues with implications for Upfield's supply chain, as identified through our regular monitoring activities.

Upfield's Grievance Committee reviews each grievance case internally, and we further investigate each of them through our direct suppliers. Upfield also collaborates with Earthworm Foundation to investigate and review each case.
